

Use of System Agreements
Information Disclosure by Top Energy Limited (Updated June 2021)

As a requirement of the Electricity Distribution Disclosure Determination 2012, Top Energy discloses both the new standard and non-standard contracts it has entered into for the provision of line services, and existing contracts where the prescribed terms and conditions have been modified.

A contract is considered non-standard if:

- The price at which the line services are to be provided is determined solely by reference to a schedule of prescribed terms and conditions that is publicly disclosed, and
- Fewer than four persons have such contracts with Top Energy, and none of those other persons is a related party.
